

## A Non- Chronological Report

### Location

Antarctica is at the bottom of the earth. Antarctica is a continent at the southern end of the world and its cold because its nowhere near the equator. The Antarctic ice and snow was created by the Himalayas.

### Animals

The only Animal that lives there is a penguin. A penguin goes underwater to catch the food. There are 17 types of penguins and those 17 types of penguins are called Emperor penguins.

### Weather

In Antarctica there are freezing cold mountains and the snow is as cold as ice.

### Features

55,000 years ago the arctic was tropical and we know that because every summer 4,000 to 5,000 scientists come to explore for new things in the arctic and Antarctica. There are big mountains on Antarctica and the biggest mountain on earth is Mount Everest.

### Changes

every animal in Antarctica can adapt to the weather. An arctic fox is brown and white in the summer and in the winter it adapts to the snow so predators can't see them.
