

## A Speech

Good morning residents. My name is Daniel Hudson and I am 9 years old.

The reason I am stood before you this fine day is that we have a horrendous threat facing our local recreation ground. Denton United are planning to demolish our lovely woodland and park to make way for an eyesore of a football stadium. In this speech I will propose why I am against this monstrosity.

Firstly, I would like to say that you would be uprooting approximately 2000 trees. This would cause a huge rise in the carbon dioxide level in the area as trees absorb it. Also, without these trees, hundreds of animals would be left homeless and I don't want this to happen. I mean, how would you feel if someone came and destroyed your home? Furthermore, all the children (including me) would ask their parents if they could go to the park and they couldn't because it is not there.

To conclude, this action will bring absolutely no benefits to the community. Keep our common it's more than you think it is! Thank you for listening. I know you will agree with my proposal.

## A Myth

The handsome Epimetheus stared at me like he was deeply in love. He surely knew that I was really an attractive woman and wasted no time and asked me,

"Will you be my wife?" I hoped for this so I smiled at him and accepted it.

After I married him, I showed him a box that I was given. The cold metal box made him gasp in fear and I started to worry.

"You have been given the box of evil!" my husband whispered to me. What he said made me deep in shock. I hid it away from my face.

The powerful evil contained clouded my mind and made me try to free the evil. The box made me insane, the evil was annoyed that I tried to recover it. The evil filled me with curiosity.

## A First Person Story

Guess what? Our band, 'Galaxy Hunters' (the best band in the world) were asked to perform at a singing contest for the first time! We were asked to play for our Auntie's son's 17th birthday. We were sweating with excitement.

At last, we were on the stage. Daphne was kind of shivering. It was time. In the middle of the stage, Polly was singing with a polished voice. All of a sudden, I accidentally stretched the electric guitar wires and they broke. It caused a terrible power cut. In a shocked way, Daphne screeched. There were frightened fans and panicking people.

Unbelievably, mischievously, came an electrician called Lewis. We were wondering what he was doing, we hoped nothing was wrong. Fortunately, he actually replaced the broken wire with a new strong cable. He said, "Is this what you are looking for?"

Eventually, I figured out that he was a good drum player too. Ecstatically and enthusiastically I asked him to join our band. Sure enough he said yes. Our band was surprised. At the end, the concert was back on the road. The new drummer was staggering for our band. The fans cheered, "Go Galaxy Hunter!!!" And, well the story ended.

## A Non-chronological Report

This is the information of the deadly, new discovered beast named galactisorus.

### What it looks like

This deadly beast is a spiky scaled dino. These scales made sure that they would not be eaten. It has a massive tail which measures up to a surprising 18.4 metres. On the very peak of its head stands a massive horn up to 16.7 metres. It was a heavily armed dino.

### Where it lives

The galactisorus lived in amazon forest. Most of the herds came from the centre. There are two reasons why

- 1) No predators were there
- 2) Lots and lots of plants

### What it eats

This exotic creature ate up to 1843g of food a day! The creature ate herb plants. They were very popular. They also ate nettles.

Archeologists suspect that the spikes from them helped more spikes to grow on the dino, quite clever. Also it ate a mass of thornes but they were very rare. And finally trees to help them grow.

## Extinction

Extinction was a very big mystery and it took almost 5 years to solve the mystery. 3 years after the discovery, an archeologist named Ben Long found out. He said  $\frac{3}{8}$  of them had a disease and the others of them had died of bacteria. Some died both. Ben Long still is not sure how they got it. Maybe from others though it still stands a mystery of the extinction of this beautiful beast.

## A Newspaper Report

On September 5th 1939, in Dusseldorf families, friends, soldiers, law enforcers along with our humble mayor, celebrated happily together as they prepared to send off the brave volunteers to defend thier country, Germany.

This magnificent send off marks the beginning of Germany's rightful return to power over Europe. These brave troops have been training to prepare themselves for war. The families were waving goodbye to the soldiers that were putting on a brave face. One child in the crowd shouted, "Good luck!"

As the soldiers went, the family's were happy however, being far from the soldiers everyone will be upset.

## A Description

I could see the excited faces of chattering children clutching on to their parents. The rollercoaster blurred with brightly as it whizzed passed, the riders screaming with delight. The infants were lining up for the Choo Choo Train whilst the juniors' girls were adoring themselves in the Mirror Tent. Boys handed in the tickets for a little footie match and thier little brothers and sisters cheered for their big brothers team.

The smell of roast chicken drifted past my nose and I followed it eagerly. The fresh, home-made bread scented sweetly on its stand. Fresh picked flowers were in all kinds of stands. Pansies in a purple stand, roses, in all kinds of colours, were presented in a rainbow coloured stand. But they all smelled fantastically sweet.

The sounds of screaming nearly damaged my ears! The geese by the pond nearby squawked cluelessly,
